**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "essentially" in claim 1 is a relative term which renders the claim indefinite. The term "essentially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is not possible to determine when a material meets the "essentially carbon" and when it does not.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bute (US 4271693)

Bute discloses the claimed invention including an apparatus for generating carbon monoxide comprising an enclosure having an inlet and an outlet at least one of which is provided with baffle with one or more holes restricting air flow from the inlet to the outlet, a container

Art Unit: 3742

located within the enclosure arranged to receive carbon material in thermal contact with an electrical heating element and means for causing air to move from the inlet to the outlet, a battery power source.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bute in view of Wiesser (US 5523744).

Bute discloses the claimed invention except the use of a fan to move the air. Wiesser discloses the use of a fan to move the air in a smoke detector testing device similar to Bute. It would have been obvious to one of ordinary skill to modify the Bute device to include the fan for testing different kinds of detectors as suggested by Wiesser.

***Response to Arguments***

Applicant's arguments filed 07/12/06 have been fully considered but they are not persuasive. Applicant argues that the prior art is used for a different purpose. It is noted that the intended use of an apparatus does not serve to distinguish it from another apparatus have the same structure as claimed. With respect to the new limitation that the material consists essentially of carbon, the term "essentially" is a relative term which renders the claim indefinite. The term "essentially" is not defined by the claim, the specification does not provide a standard

Art Unit: 3742

for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
